[Sponsorship Information](#)

Topics Discussed

- **In the Mind of a Hacker** - Patrick Hogan of the Department of Homeland Security will discuss recent trends in cybercrime with a focus on the motivations, behaviors and techniques of hackers
- **Global Breach Notice Obligation** - Brian Hengesbaugh of Baker McKenzie will summarize the recent developments in global data breach notification law, and will highlight key strategic points on making decisions about breach notification.
- **Cybersecurity and Technology Legislative Update** - Tyler Diers of the Illinois Chamber of Commerce to discuss recent changes in legislation.
- **And More!**

Keynote Speaker

Adil Wali - CEO & Founder of Merit

Merit is on a mission to make cryptocurrency usable and accessible to the real world. Merit is the world's first invite-only cryptocurrency, which adds a tremendous amount of safety to the blockchain in addition to enabling the innovation of proof-of-growth mining.

Adli is a passionate entrepreneur that has created several other companies including that of FoxCommerce, Hiiron, and ModCloth.
