

Good Afternoon,

The Slag Cement Association (SCA) has been working hard this year to continue providing resources on slag cement use, even though we are not able to connect in-person as easily as in the past. As such, I wanted to pass along some tools and resources available to you and your colleagues.

This year we launched our first webinar series on slag cement, and I am happy to announce that all 5 recorded webinars are now available on our website to view free of charge.

#### [SCA Recorded Webinars](#)

The SCA is also able to schedule live webinars as requested on various slag cement related topics. If you are interested in scheduling a presentation for your team, please reach out to me directly.

Be sure to explore other areas of the SCA website for even more information on slag cement use. Some of the resources you will find there include:

- Digital announcement of the [2019 Slag Cement Project of the Year Award Winners](#) (12 construction case studies and 2 research projects)
- [2020 Award Program Nomination](#) Forms
- 29 [Technical Information Sheets](#) on slag cement use
- 9 slag cement [state fact sheets](#)
- [LCA Calculator](#) for slag cement (free download)
- [SCA E-Newsletter Sign Up](#)

I look forward to connecting at an industry event in the future, but in the meantime feel free to reach out with any questions you may have on slag cement use.

Thank you and stay safe,

Drew Burns
