

IRMCA Members; Identify if your area airport is going to have some work done through the new 6 year IDOT Multi-Year Plan and notify Jim Randolph. I will dig into the engineering plans and if they are not concrete, we will work to be sure IDOT will also take concrete bids where the design is otherwise asphalt. Please do your part in promotion by letting me know the status of any airports of any size within your market. Previous promotion efforts are evident in this picture that is using both paving materials. We can also discuss concrete overlays where engineering may not have considered that option.

I expect to hear from many of you, and I would like a reply from all of you so we can jump on this right away. There are more dollars available for airports at this time statewide than any time I can remember. I have been talking about this for the last several months. NOW IS TIME FOR ACTION! Give me 30 minutes of your day to survey and tell me about your airport!

Email or call me and tell me about your airport!

Am I being repetitive, YES! <https://aashtojournal.org/2022/08/12/illinois-dot-issues-statewide-aviation-system-plan/>

End of Week Summary: August 19, 2022

State Update

The Illinois Department of Transportation announced the Multi-year Program last Friday. IDOT will spend \$34.6 billion to improve roads, bridges, transit, rail, airports, and ports over the next six years. The program will spend \$6.36 billion on highway reconstruction, \$6.4 billion for bridge improvements, \$2.03 billion for strategic expansion, \$2.48 billion for engineering and land acquisition, and \$1.55 billion for safety and systems modernization. You can view TFIC's analysis [here \(PDF\)](#). [More](#)

The Illinois Department of Transportation recently released a new Illinois Aviation System Plan, identifying the short- and long-term needs and goals of the state's airports. The Illinois Aviation System Plan focuses on individual airports and the aviation system as a whole, looking at ways they can support economies throughout the state, improve quality of life and boost mobility. Federal Update

The U.S. Department of Transportation recently awarded more than \$2.2 billion in grants from the Rebuilding American Infrastructure with Sustainability and Equity or RAISE program to help urban and rural communities move forward on projects that modernize roads, bridges, transit, rail, ports, and intermodal transportation systems. Projects in Harvey, East Moline, Chicago, and Springfield received funding. [More](#)
