

LIVE Webinar: Wed, Jul 20, 2022 11:00 AM EST

Leverage ConcreteGO and Sysdyne•BI™ To Enhance Operational Decision Making

Join us on **Wednesday** for a webinar to experience **LIVE** how to leverage ConcreteGO Cloud Dispatch and Sysdyne BI to enhance operational decision making

LIVE WEBINAR

📅 July 20 ⌚ 11am

REGISTER NOW

ConcreteGO Cloud dispatch has been deployed by many Concrete Producers in the US and around the world, and has processed greater than 35 million yards of concrete in 2021 alone. It is maintenance-free, easy to use, and helps users manage ready mix plants more effectively and proactively, with unrivaled customer support available 24/7.

Sysdyne BI provides **real-time** business insights by leveraging the End-to-End (E2E) cloud-native solution we've developed including ConcreteGO Cloud Dispatch, Pioneer **Cloud Batch** and the **iStrada** delivery management system. Sysdyne BI is the only BI (business intelligence) product in the market that aggregates data across the platforms of dispatch, batch, truck tracking, and time and attendance in the Cloud. It presents the full picture of your operation and aids in your decision making process.
