

UPCOMING WEBINAR

Shrinking Carbon Emissions Through Innovative Cement and Concrete Technologies

Tuesday, November 17, 2020 @ 9:00 AM PT | 12:00 PM ET
| 18:00 CET

[Register Now](#)

The concrete industry is embarking on a period of rapid innovation. Everything we know about how buildings are constructed—including the manufacture of building materials like concrete—will be reimagined with decarbonization in mind.

[Join our upcoming webinar](#) to hear from concrete and cement industry experts as they discuss:

- How Supplementary Cementitious Materials (SCMs) can impact the Global Warming Potential (GWP) of concrete by 25-35%
- How low-carbon Portland Limestone Cement (PLC) can reduce CO₂ emissions by a further 10%
- Why capture and utilization technologies like CarbonCure are a permanent solution to carbon removal

If you cannot make it, register anyway and we'll send you the recording.

Our Expert Speakers

Adam Auer
Vice President,
Environment and
Sustainability,
Cement
Association
of Canada

**Matt Dalkie, P. Eng.,
LEED AP BD + C**
Technical Services
Engineer,
Lafarge Canada Inc.

Kevin Davis
Regional Sales Director,
CarbonCure
Technologies
