Climbing Out of Covid: The Outlook for Construction

Pierre Villere | Allen-Villere Partners

In times of turbulence, leadership is incredibly challenging and even more important. One of leadership's main responsibility is normalizing the chaos, and creating solid ground for your employees to bring their best within all of the turbulence. In this session, we will discuss how to help normalize the chaos, and the power of using predictability to build the solid ground for performance.

TrackIt Delivery Cycle Monitoring

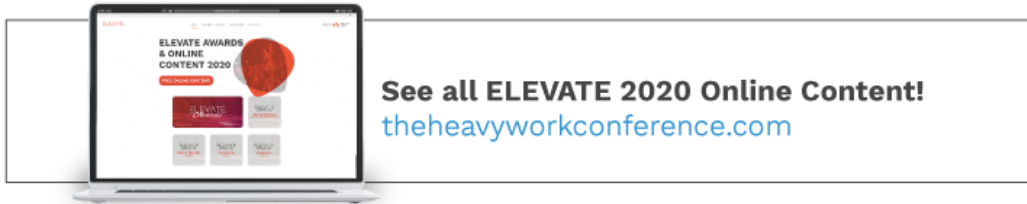

Ryan Winter | Command Alkon

Learn the value of full, touchless autostatusing with TrackIt's new Delivery Cycle Monitoring functionality. Review the requirements for adding drum rotation and speed sensing to your fleet to capture begin/end wash, begin/end pour loading and begin wash statuses as well as capturing water added values. Discuss the benefits that can be easily realized for drivers, dispatch and your overall fleet performance.
