

SYSDYNE - April 2023

Learn How to Save Cement and Optimize Material Demand with CloudBatch

In the Cloud since 2008, we've continued our push for innovation in the Ready Mix Concrete industry. By offering **CloudBatch™**, the Cloud-Native Batch Control system, we've grown to become the only interoperable cloud solution for Ready Mix producers.

Take a look at our recently recorded webinar where we demonstrate and explain how CloudBatch can be used to optimize material demand and cementitious content!

A graphic for a webinar recording. It features a computer monitor displaying a complex industrial control interface with various tanks and pipes. To the right of the monitor is the 'CLOUD-BATCH' logo, which consists of the stylized 'S' icon followed by the text 'CLOUD-BATCH'. Below the monitor, there is an orange banner with the text 'WEBINAR RECORDING' and a white banner with the text 'SAVE CEMENT AND OPTIMIZE MATERIAL DEMAND'. The background of the graphic is a light grey, textured surface resembling concrete.
