Sysdyne•BI™ by SYSDYNE | **LIVE Webinar**: Wed, Jul 20, 2022 11:00 AM

Introducing Sysdyne•BI™ Business Intelligence

A massive amount of data is generated daily from every aspect of operations for Concrete Producers. As Satya Nadella, CEO of Microsoft said "*The key challenge, or the key opportunity for any organization is to be able to convert data into intelligent actions.*"

Cloud Technology empowers simple access to and analyzation of this massive amount of data in real time - With these new capabilities comes a growing desire to gain business insights in order to take intelligent actions. **Sysdyne•BI™** is our answer to the call. It brings real-time, actionable business insights to make faster, better operational decisions to drive efficiencies, customer experience and bottom line.

Armed with E2E (End-to-End) data across the full spectrum of ready-mix operations (Dispatch, Batch, GPS Truck Tracking, Time & Attendance,) the dashboards and reports built using Sysdyne•BI puts the collected information into context, depicting the true picture of your business status.

You don't want to miss this webinar!

On **July 20th**, we are hosting a webinar to give you an overview of our cloud-native concrete dispatch solution – **ConcreteGO**, which you can access anywhere at anytime using any device.

Even better, we will further introduce **Sysdyne•BI**, your business intelligence tool to save millions with better customer satisfaction. Our Material Demand Dashboard presents your material demand and inventory in real-time (within 30 min). We have built report that you can get a score card for each or your customers, and so much more.
