

DIGITAL FLEET

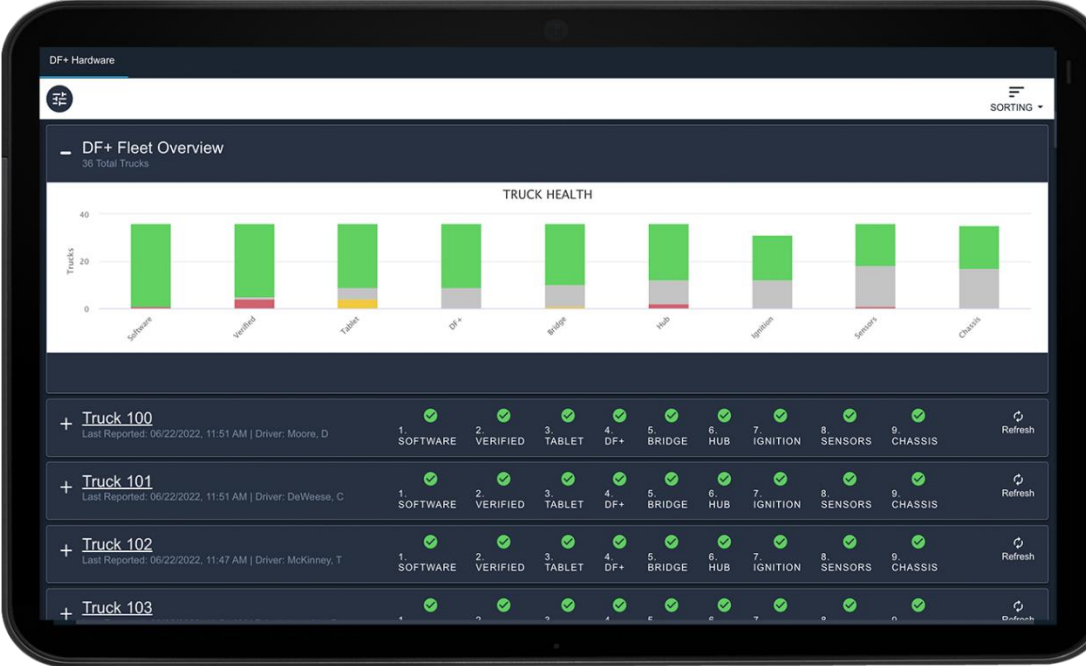

New Feature Highlights

- **Stop Wasting Fuel** - With the average [price of diesel at \\$5.71](#) you cannot afford to waste fuel. That is why we are releasing new features that provide key insight into where you are burning diesel:
 - Added new Fuel Usage by Truck and Ticketed report to show fuel usage broken down by when a truck is ticketed and when it is not ticketed
 - Added fuel usage data to the Efficiency Dashboard
 - Added fuel usage per ticket to the Truck Dashboard
- **Learn How To Use Our Verification Tool** - Our Verification Tool ensures that the components on the truck were installed correctly, eliminating guesswork. By providing instant feedback on errors and assisting with troubleshooting you can confirm a working system. [Learn how to use it here!](#)
- **What's Coming! New DF+ Dashboard** - Our DF+ Hardware Dashboard lets you easily view the state of your sensor connections. This saves time with troubleshooting and allows you to find solutions fast. If you are interested in this dashboard, please contact sales or support to learn more.
