

DIGITAL FLEET

Revolutionizing the Ready Mix Construction Industry
With Weekly Improvements

New Feature Highlights:

- **Critical Alerts** - The Avoidance Zones alerts provide a critical alert to the driver when entering an identified Avoidance Zone geofence. The critical alerts displayed at all times (stopped or moving), are read out to the driver and aren't cleared until the driver acknowledges the alert. These alerts can be used for road restrictions you want the drivers to know about or to identify areas of importance for the drivers.
- **Easy Installation With Verification Tool** - Installing Digital Fleet+ Hardware is a simple process, but to ensure you don't miss a step, we created an easy-to-use verification tool to help.
- **Single Sign-On (SSO) with Microsoft Azure Active Directory** - Based on customer feedback, we added the option to sign into Digital Fleet using a Microsoft Azure email account.

Overview of Weekly Improvements:

- **Scheduling Updates** - We cleaned up our scheduling by fixing minor bugs, making our system more intuitive.

- **Improved Troubleshooting** - Updated our GPS and Digital Fleet+ troubleshooting to find problems quickly.
- **Digital Fleet+ Improvements** - Added discharge revolution counter along with other Digital Fleet+ data.

New Hire - At Digital Fleet, customer service is extremely important to us and we are adding to the team to make it even better. We are excited to announce Dan Zuk as our new Technical Customer Support representative. He will be in a front-line customer support position, helping customers by providing resolution to their inquiries and educating them on the Digital Fleet solution. Welcome, Dan to the Digital Fleet team!
