

DIGITAL FLEET

Introducing Digital Fleet+ Load Graphs

Know What is Happening to Your Concrete

We are excited to announce Digital Fleet+ Load Graphs. Get key insights into how your drivers and truck performed on the job site. The Load Graphs provides a simple visualization of the load data on each individual ticket. This data includes status times, discharging times, comparative slump reading, water added per volume, drum speed, and drum rotation data for the duration of the ticket.

Digital Fleet+ allows you to maximize your fleet's productive time through one easy-to-use platform.

**For Digital Fleet+ Customers, Load Graphs Are Already Available
- Contact Us To Learn More**

Most Adaptable Hardware in Ready-Mix

Digital Fleet+ is the most adaptable hardware in ready-mix. It directly monitors Chassis/Engine Data, Water Flow, Slump, Washout, and Drum Speed & Direction to give you unprecedented access to data from your equipment.

Have a data-enabled tablet? Digital Fleet+ hardware pairs directly to a data-enabled tablet allowing you to reuse equipment and sensors that are already on the truck.

With new sensors, features, and integrations coming in the near future, our system continues to evolve.
