# Building An End-to-End Concrete Ecosystem

Like most businesses, Concrete Producers use dozens of different business applications daily to get the job done. Using these specialized software tools to perform different tasks, creates what we call a **Technology Ecosystem**. Why does that matter? Read on and find out.

The foundation of business is based on this principle. Every aspect of your business depends on your technology platforms and applications, from your budget to your customer

database, so making sure they are performing optimally is crucial for the success of your business. What can you do to make sure that your technology ecosystem is optimized?

## What is a technology ecosystem?

While the term "technology ecosystem" has several meanings, in this article it is defined as the group of tech solutions that a company uses to run its business on a daily basis, and how these solutions integrate to offer better defined data workflows and increase efficiency.
