Criteria When Selecting Concrete Dispatch Software: Find the Right Fit

Dispatch software for concrete producers is the center of all operations. Order taking, scheduling, tracking deliveries, and some back-office functions such as invoicing can all be handled by dispatch software.

Utilizing a productive dispatch solution can simplify concrete production workflows, improve operational efficiency, and significantly improve productivity. Also, it can expand with your business growth in a finger snap.

Dispatch is connected to ERP, concrete batch, quality control software, GPS tracking systems, and more. Once it's implemented, it's very hard to make a change again, so it's important to make the right choice that will meet your needs and grow with you quickly and easily.

There are many companies out there providing concrete dispatch solutions. Each one has its pros and cons. We think for you to make the right decision on a dispatch system, in addition to evaluating the functionalities of each choice and see if it meets your needs, you should take a close, hard look at:

- The technology the dispatch is built with.
- The product roadmap
- The customer support
- The character of the company that provides you the dispatch software
