

In the same way that nutritional labels report the measured nutrition facts for food products, Environmental Product Declarations (EPDs) report the measured lifecycle environmental impact of a product. This helps designers and builders to make more informed decisions.

Concrete producers will soon be required to use EPDs and [this blog post](#) can help you prepare. It covers:

1. Why industry and governments are driving change
2. Why proactive adoption by producers is required
3. How to understand EPDs
4. How to source data for EPDs

Read [Concrete EPDs: The 4 Things You Should Know](#) to find out how you can start winning new business with EPDs.

[Read the article to see how you can take action](#)
