# THAT'S SO SMART!!

---

**SAME ASSETS. MORE VALUE. WITH CONCRETE.**

---

## **CONCRETE OVERLAYS OF DETERIORATED ASPHALT PAVEMENT**

Each year, tons of asphalt is placed on the ground or on top of existing asphalt, putting those petroleum products in the heart of your community, often at your local school and parks. A Concrete Overlay, with a useful life of 30 years (compared to 10-15 for asphalt) would eliminate much of that asphalt being placed. Plus, provide other sustainable benefits.
