

As a Midwest Market Development Manager for CarbonCure Technologies, **Allison Palmer** drives CarbonCure's mission to reduce 500 megatons of annual carbon emissions from the cement and concrete industry. CarbonCure manufactures a technology that enables concrete providers to utilize post-industrial carbon dioxide in their manufacturing processes in order to achieve significant embodied carbon reductions without compromising concrete quality. In her role, Allison collaborates closely with designers and builders who seek to reduce the carbon impact of their building and infrastructure projects. Allison lives in Cleveland, Ohio (Go Browns!) with her fiancé and black labradoodle, and enjoys golfing when the weather permits
